LINING THE WAY

# Rolled Liner Installation Guide

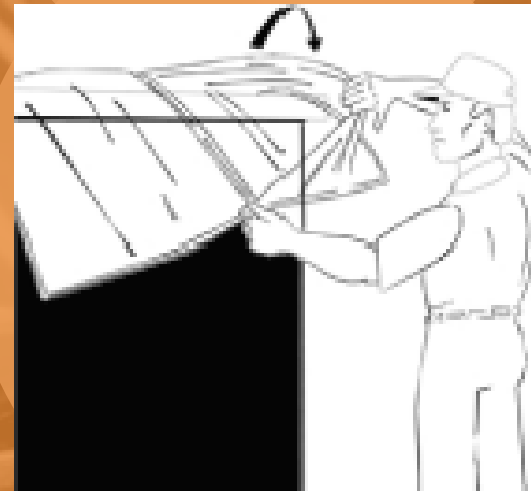

## Step 1.

From the end wall of the container, place the roll in the center of the container rim. Unroll 1 foot of the liner so that it hangs down the outside of the container. While holding on to the end of the liner, shove the roll over the rim, allowing it to unroll across the bottom of the container to the opposite end.

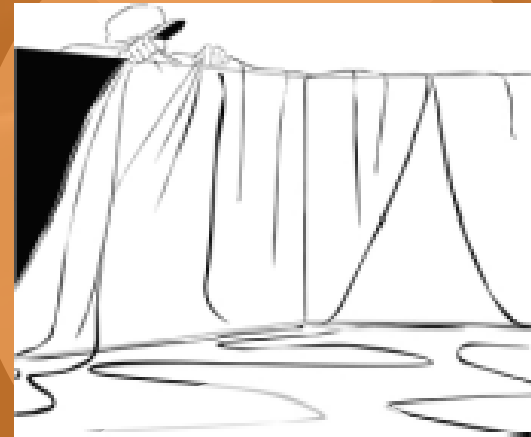

## Step 2.

Unfold the liner, ensuring that the center slit remains centered in the container. **DO NOT TEAR THE END SEAM OF THE LINER.** From the endwall, pull the top layer of the liner toward you as shown. Fold it over one corner of the container and then over the other corner.

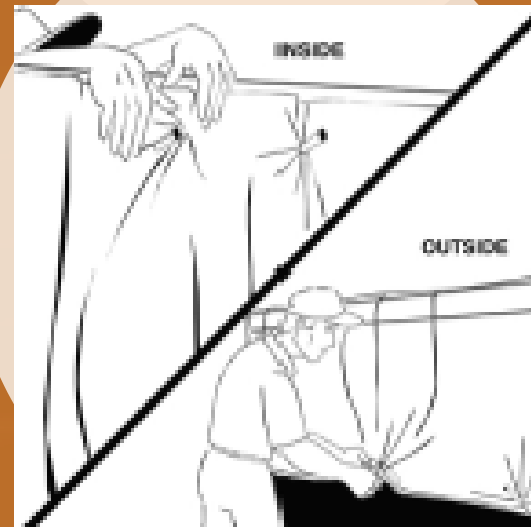

## Step 3.

With the top layer secured over the end corners of the container, continue down one side, pulling the top layer up and over the sidewall. Continue around the perimeter of the container.

## Step 4.

\*\*\* If the container has hooks, secure the liner around the hooks.
